

Experiment 3

Tree, Head and Tail Commands

Aim

To execute and understand the usage of tree, head, and tail commands.

Theory

head Command

Displays the first 10 lines of a file.

head filename.txt

tail Command

Displays the last 10 lines of a file.

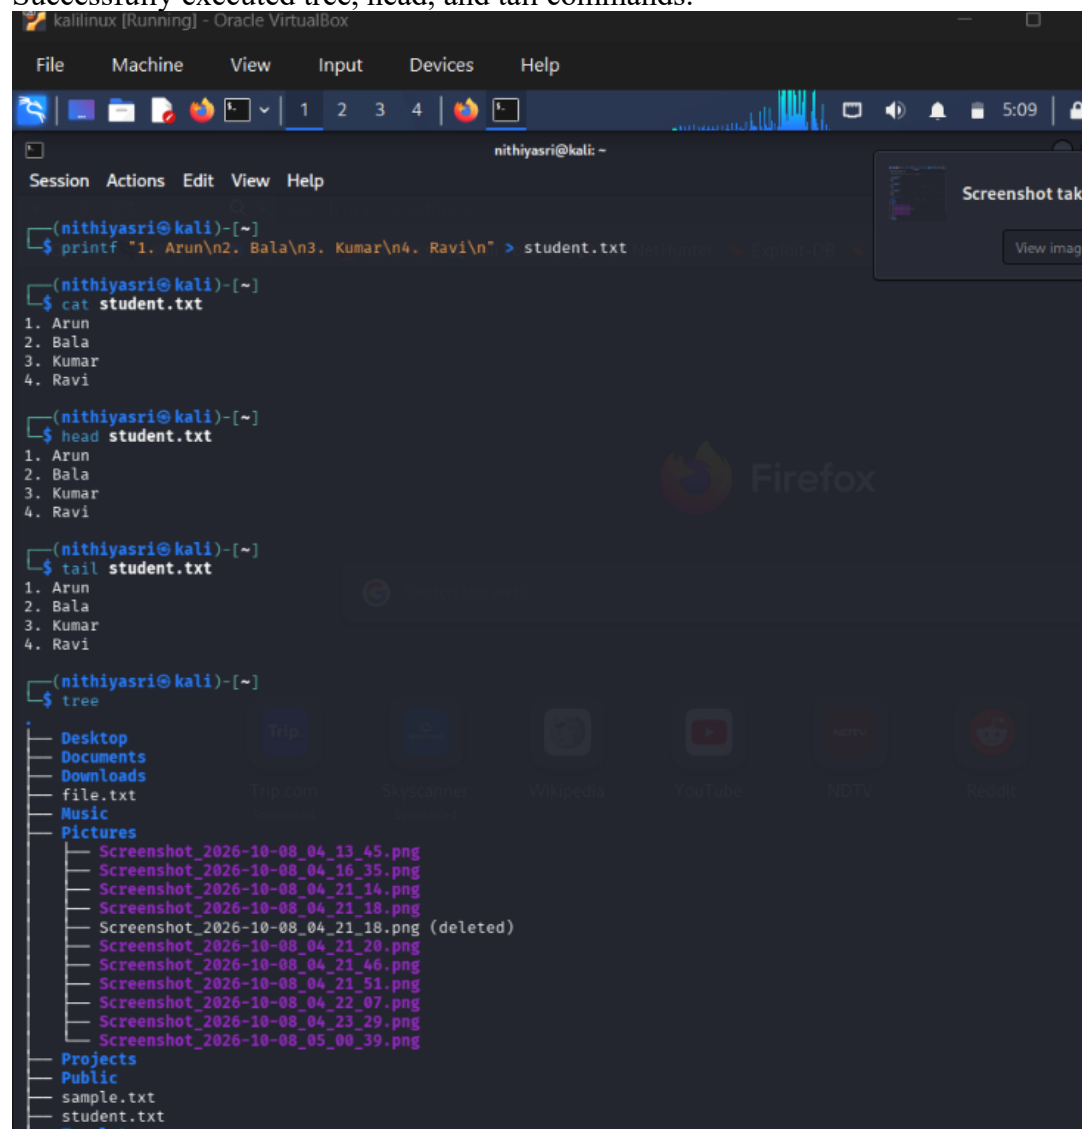

tail filename.txt

Procedure

1. Create a text file containing multiple lines.
2. Execute the head command.
3. Execute the tail command.
4. Display directory structure using tree.

Result

Successfully executed tree, head, and tail commands.
