

Experiment 4

Directory and File Display Commands

Aim

To execute ls, cat, and mkdir commands.

Theory

ls Command

Lists files and directories.

ls

cat Command

Displays file contents.

cat file.txt

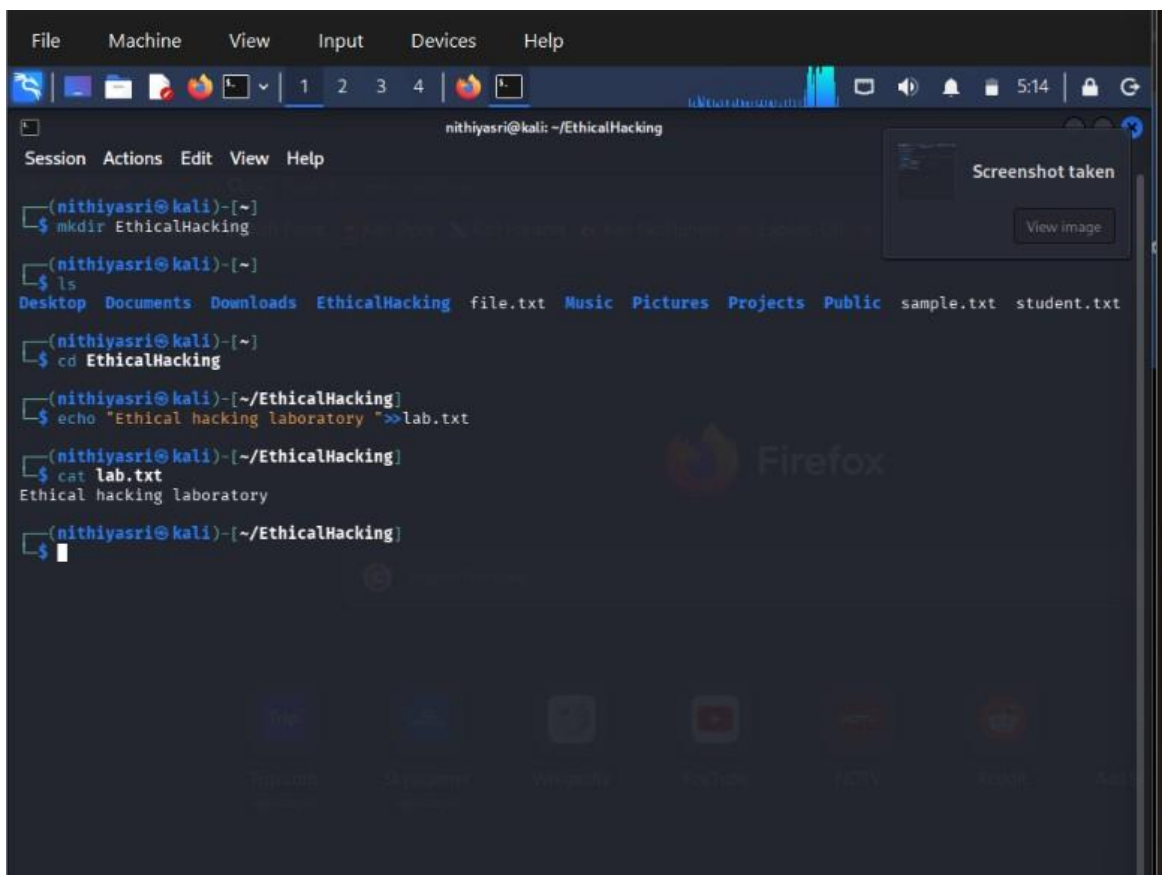

mkdir Command

Creates a new directory.

mkdir EthicalHacking

Procedure

1. Create a directory using mkdir.
2. List files using ls.
3. Create a text file.
4. Display file contents using cat.

The screenshot shows a terminal window titled "nithiyasri@kali: ~/EthicalHacking". The terminal displays the following commands and their outputs:

```
(nithiyasri@kali)-[~]  
$ mkdir EthicalHacking  
(nithiyasri@kali)-[~]  
$ ls  
Desktop Documents Downloads EthicalHacking file.txt Music Pictures Projects Public sample.txt student.txt  
(nithiyasri@kali)-[~]  
$ cd EthicalHacking  
(nithiyasri@kali)-[~/EthicalHacking]  
$ echo "Ethical hacking laboratory ">>lab.txt  
(nithiyasri@kali)-[~/EthicalHacking]  
$ cat lab.txt  
Ethical hacking laboratory  
(nithiyasri@kali)-[~/EthicalHacking]  
$
```

A "Screenshot taken" notification is visible in the top right corner of the terminal window.

Result

Successfully executed ls, cat, and mkdir commands.
